~~~

Q: What does this program do?

A: Tic Tac Toe allows you to play on a network with other players.

~~~

Q: What should I do first?

A: Get on a network and give this program to someone else to play.

~~~

Q: What does "Server is [OFF]" mean?

A: Someone needs to start the server so you can start playing now.

~~~

Q: My friend just started the server; what am I supposed to do?

A: Type in your friend's IP address and hit "Enter" to start game.

~~~

Q: Why is it asking me if I want to play as X/O today?

A: Xs and Os are used to play Tic Tac Toe; click on "Yes" or "No."

~~~

Q: Why is the game telling me that I will be playing as X/O?

A: You connected last to the server, and you get the other symbol.

~~~

Q: Why is the game telling me it is waiting for a response?

A: Your opponent has not clicked the "OKAY" button to confirm yet.

~~~

Q: The program said something and is just sitting there.

A: Hopefully, you remember how to play; if not, click on the grid.

~~~

Q: Why does the game freeze after it is over?

A: It will wait for ten seconds before showing the opening screen.

~~~

Q: Who wrote this program?

```
A:  -----  +----  +---\  /---\
       /   |      |   |  |   |
      /    +----  +---/  |   |
     /     |      |  \   |   |
    -----  +----  |   \  \---/
    =========================
```
